4 FIRST AID MEASURES

- Inhalation:** Generally this product does not present an inhalation hazard. If dust is inhaled, blow nose to remove substances from nasal passages. If symptoms develop, move victim to fresh air. Give oxygen or artificial respiration if needed. If symptoms persist, obtain medical attention.
- Skin Contact:** Generally this product does not irritate the skin. If skin is exposed to dust, irritation and/or a rash may occur. Flush skin with water for at least 15 minutes to ensure all chemical is removed. Consult a physician if irritation and/or a rash persists.
- Eye Contact:** Generally this product does not irritate the eyes. If eyes are exposed to dust, abrasive irritation may occur. Do NOT rub eyes! Flush with large amounts of water for at least 15 minutes, lifting upper and lower lids occasionally. Remove contact lenses if present and easy to do so. If irritation persists, obtain medical attention.
- Ingestion:** This product is not likely to be ingested. If accidentally ingested, rinse mouth with water. Give 3-4 glasses of water or milk to dilute stomach contents. Do NOT induce vomiting unless instructed to do so. Never give anything by mouth to an unconscious person. If significant amounts are swallowed or irritation or discomfort occurs, seek immediate medical attention.

Most important symptoms and effects, both acute and delayed:

The most important known symptoms and effects are described in the labelling (see Section 2) and/or Section 11.

If incinerated, may release toxic fumes.
Use water spray to cool unopened containers.
See Section 7 for more information on safe handling.
See Section 8 for more information on personal protection equipment.
See Section 13 for disposal information.

6 ACCIDENTAL RELEASE MEASURES**Personal Precautions, Protective Equipment and Emergency Procedures:**

Use personal protective equipment as required.
Keep dust from contacting eyes and skin.

Environmental Precautions:

No special measures required.

Methods and Materials for Containments and Cleaning Up:

Pick up large pieces mechanically. Sweep up dust carefully without generating airborne nuisance dusts.
Collected waste should then be placed in container for disposal.
Dispose of contaminated material according to Section 13.

Reference to Other Sections:

See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment.
See Section 13 for information on proper disposal.

7 HANDLING AND STORAGE**Handling Precautions:**

Avoid breathing dusts.
Avoid contact with eyes and skin.
Keep containers closed when not in use.
Do not expose product to open flame, excessive heat, or direct sunlight.
Keep material out of reach of children.
Keep material away from incompatible materials.

Storage Requirements:

Keep container tightly closed.
Do not store uncured material at temperatures greater than 50.00 °C (122.00 °F).
Do not store in direct sunlight.
Store away from strong acids, strong bases, strong oxidizing agents, strong reducing agents, Amines, Hydrogen Fluoride and Acid Anhydrides.

8 EXPOSURE CONTROLS/PERSONAL PROTECTION**Engineering Controls:**

All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use local exhaust at filling zones and where leakage and dust formation is probable. Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.

Personal Protective Equip:

Eye/face protection:
Eye protection is not required if proper chemical handling and hygiene practices are followed. If desired, when using material use safety glasses according to HMIS PP, A. All safety equipment should be tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

Skin protection:

Not required if proper chemical handling and hygiene practices are followed. If desired, use gloves made from Neoprene, Nitrile or Buna rubber. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact. Dispose of contaminated gloves according to applicable laws and laboratory practices.

Body Protection:

Not required. Chemically resistant safety glasses and gloves may be used, if desired. Type of protective equipment should be selected based on concentration amount and conditions of use of this material.

Respiratory protection:

Not required. Full-face vapor respirator may be required as backup to engineering controls when proper engineering controls are not in place to keep TLV and PEL limits below defined thresholds. Respiratory protection must comply with 29 CFR 1910.134.

Control of environmental exposure:

Prevent leakage or spillage if safe to do so. Do not let material enter drains.

Components with workplace control parameters:

Contains no reportable substances with occupational exposure limits values.

Biological occupational exposure limits:

Contains no reportable substances with biological occupational exposure limits values.
